How can you improve Cyber Security awareness In your organization?

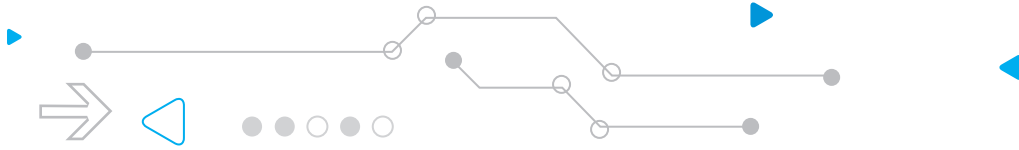

INFORMATION SECURITY AWARENESS

Information security awareness and user behavior is very important, because they can be the root cause of security incidents from human failures and policy breaches. QUADRON can hold Information Security Awareness trainings and campaigns, and security training specific for general users, managers and system developers in order to improve their IT security awareness.

The content of the education of Information Security Awareness is based on our professional experience. The information security awareness training is an on-site training for the audience with two or more optional occasions, specifically for general users. Service can be supplemented with a security awareness campaign. The education covers the following topics: Data and threats, home protection, password management, social networks, viruses, smartphones, internet banking, cyberbullying, etc.

Business and security advantages of the service:

- ▶ Awareness training is the most cost-effective way to increase security levels of the Organization
- ▶ Increase security awareness among the employees
- ▶ Employee related attacks and phishing mails may become inefficient, helping you avoid serious potential incidents may be avoided
- ▶ Security awareness becomes part of your enterprise's culture. Employees will be able to recognize threats, thus reducing the outage time of business processes caused by incidents

During the on-site work, QUADRON will:

- ▶ Provide qualified (CISA, CISM, CRISC, ISO 27001 Lead Auditor) information security professionals to hold information security awareness trainings and campaigns
- ▶ Trainings can be classroom or e-Learning based as well

Delivery of the service:

- ▶ Information Security Awareness training material (the presentation)
- ▶ Scheduled classroom lessons
- ▶ E-Learning training material with electronic exams
